### The History of the World

From the Big Bang to Humans

Friday, September 8

11:00 am

Free

The Big Bang started it all; 14-Billion years ago. Our Solar System appeared 4.5 billion years ago, followed soon by life as single cells. It took oxygen and water to let life thrive with mammals appearing only 200 million years ago. Man's time on earth is just a blink in the timeline. Learn how it all happened and what we are headed for – the 6th extinction.

**About the presenter:** Rick Deutsch is an accomplished and professional speaker. He holds a degree in Aerospace Engineering, an MS and an MBA. After serving in the US Air Force, he worked in Silicon Valley for defense contractors, Intel Corp and Sun Microsystems in marketing positions. Rick is an adventurer. He is also a histophile – a lover of history and gives talks the “average” audience enjoys: the Great Wall of China, Aviation, the Renaissance, Napoleon, Genghis Kahn, the Titanic and even UFO's. The list includes 70+ image based talks – no “death by PowerPoint” here!
